WHY IS THIS IMPORTANT?

- The answer is simple – to draw more participants or customers. Drive more foot traffic to your business or to an event you're hosting in the community.
- Not only do most people use the event websites to connect with their friends and family, but also artists and venues that frequently organize events use these platforms too. Put the two together, and you have a massive marketing force.

OPTION 3: SET UP EVENTS ON OTHER KNOWN PLATFORMS, OR OPTIMIZE YOUR WEBSITE EVENT LISTINGS

We can pull event content from sources such as Google, Facebook, Eventbrite, Etix.com, and partner webpages. Marketing your event on the wyomingcarboncounty.com/events/events-calendar Events Calendar page starts with setting up your event on a website that is search engine optimized.

WHY SHOULD YOU CARE ABOUT SEARCH ENGINE OPTIMIZATION (SEO)?

- Aside from allowing your event to be pulled into the Events Calendar, SEO on your business website helps bring quality organic traffic.
- Make sure events on your business website are set with unique URLs so that Google can "find" them and display to a broader audience.
- Add as many details to your event listings as possible, such as address, ticket information, links, categories, etc.
